Modules

01/07/2013 10:21 by sgtmudd

We have updated the Forums At-A-Glance Admin with a new enable/disable option (Requested by a member)

We have also built a very basic About Us modules with admin back-end for editing it's content (Also a request by a member)

Both modules are available for download in the PNPv1 module forum:
<http://www.platinumnukepro.com/modules.php?name=Forums&file=viewforum&f=62>

For those not in any rush for these two modules, they will be included in the next release package of PNP.
