[CMS Content Management System PHP Nuke Nuke php themes modules Platinum Nuke Pro 7.6.PNP Platinum Nuke Pro 7.6.PNPv1.0.0b](#) RELEASEDÂ May 17, 2013

Â

We have released Platinum Nuke Pro 7.6.PNPv1.0.0b! Some of the changes and fixes are listed below. We are releasing this version now since it has more php5.3+ updates and some other bug fixes and tweaks. Unfortunately the theme conversions are going a bit slow :(But we are working on them as time permits.

Â Updated in 7.6.PNPv1.0.0b :

===== Shopping cart layout issues - Thanks TB9848.! Issue with ranks. Added a birthday update notification in user profile view. Updated the language translation package. Moved sNavi to Administration Menu. Added snavi.css and images to included theme packages (Part of the theme conversions process). Fixed sNavi width issue. Fixed initial start date in the installer. Video stream module homepage link wrong. Created 'Edit user profile' admin link in view user profile.

Also did some more php5.3+ updates and fixed a few member submitted bugs.
